Development

Pegasus helps clients to attain their business goals by designing, developing, integrating and supporting mission critical applications and systems.

Through years of experience Pegasus has gained solid cross-domain experience that helps to easily understand and optimize customers' business processes.

We closely interact with customers to understand their business and solution requirements before building systems to suit the needs.

Leveraging the full potential of up-to-date technology platforms such as .NET, Java/J2EE, LAMP, CMS, AI, AR, VR and analytics, we deliver systems with optimal cost/performance ratio. At Pegasus, we aim at producing technically robust and elegant intuitive solutions that cost less to develop and maintain.

Following an established development methodology based on best industry practices helps us to ensure consistently successful on-time and on-budget Performance..
